success in England. Perhaps

THIS LITTLE FRENCH HAT, CHOSEN BY AN AMERICAN

concern in Paris as to certain fashion will succertae than as to its probneeds must know what is meant by success. If you judged the success of a French fashion in America by the actual number of hats or frocks of the type worn in the land of the brave and the free, then by all means success was assured. Those matador and toreador hats, those hats with beaded fringe dropping over the eyes, hats with black lace veils of at the side or back, and, above all, hats with imitation Spanish combs stuck somewhere into the trimming—they are just the thing to capture the quantity vote of America. And doubtless

f success. At least from the point f view of one sort of importer, just

hats that are always see to meet with English approva!. With American taste there is more of a gamble.

How would America take the hats based on Spanish inspiration?

That question was asked quite trial for trimming.

The good housekeeper becomes an isstute judge of textiles. For her purchasing of clothing, iraperies, bedding, table linen and water, then compare the dried and ironed sample with the bolt of unlaundered cloth.

No reply can be made to queries not conforming to instructions, address Dr. W.lliam Brady, in care of The Star.)

moderately advanced (second stage) do.

As Dr. Duncan admits, this effect

moderately advanced (second stage) tuberculosis of the lungs smoke without impairing his prospect of recovery?

Physicians with extensive experience in the treatment of tuberculosis seem to hold different views. Dr. E. A. Duncan of El Paso, Tex., quo.est the views of several authorities, to this effect: "It is better for every patient to stop, for a time, all to-bacco if he possibly can"—(Lawrason Brown, M. D., in "Rules for Recovery From Tuberculosis." Philadelphia, Lea & Febilger). This little book should interest every victim of tuberculosis. "Smoking has no effect on the tuberculosis process in the lungs,"—(Fishberg, "Pulmonary Tuberculosis," Philadelphia, Lea & Febiger). "To-bacco does the patient no good and some harm, therefore should not be used."—(Pottenger, "Tuberculosis, and How to Combat It.") "The use of tobacco cannot have any but harmful effects on the patient."—(Wittieh, "Information for the Tuberculous." St. Louis, C. V. Mosby Co.) "Chronic inflammatory conditions do not favor bacterial infection."—(A. V. Krause, M. D., "American Review of Tuberculosis," April, 1918.) From a study of soldiers, Dr. Webb concluded that smoking does not predispose to tuberculosis, and from similar studies Dr. Duboff found tuberculosis throat among smokers without discriminating unsured and the properties of the stomach of the throat. There is no such state or disease as "catarrh."

Tonnils.

I have been informed that the best way to have tonsils removed is by surgical excision. Dr. Duboff found tuberculosis throat complications no more frequent among smokers than among nonsmokers. Without discriminating unfairly I may add that I should place greater weight upon the opinions of such authorities as Brown and Pottenger in a matter of this kind.

Dr. Duncan mentions one case in which the smoking of a cigarette invariably brought on a mild feverand this fact was first observed by the intelligent patient himself. Dr. Duncan accounts for this in an interesting way. He reminds us first that the immediate effect of a smoke, in habitual smokers, is to increase the blood pressure and the pulse rate, as a result of which, of course, the general circulation is stimulated or becomes more active. This increased movement of blood is shared by the blood in the chest or lungs, and therefore a greater dose of tuberculin or

movement of blood is shared by the blood is the chest or lungs, and therefore a greater dose of tuberculin or tuberculosis poison is thrown into circulation than the patient is accustomed to, and fever develops. Dr. Duncan compares the effect of a smoke to the effect of exercise in lung tuberculosis, and this is the instructive noint of his contribution, which I hope I am making clear to the reader.

reader.

The great principle upon which hinges recovery or arrest, in the treatment of lung tuberculosis, is the judicious use of those two most powerful remedies, rest and exercise. That is why I have always argued so persistently on the first essential for recovery; namely, the constant supervision and attendance of a physician.

sician.

A minute dose of exercise, such as sitting up in bed, or getting out into a chair or walking across the room,

Smoke and the Lunger.

Does smoking increase an individual's susceptibility to tuberculosis?

Better.

to a new mode that might otherwise seem to possess especial attractions for American women. Perhaps if the wave of Spanish millinery had swept landward two months earlier it might have met with a different sort of success. Fortunately or unfortunately, it came so that by the time most women were concerned with the serious business of buying autumn hats these things were an old story.

Art in Selecting.

There are women who can afford to disregard the taste of the multiple trude. If what they have set their hearts on happens to be the mode that is exploited by ready-made dress manufacturers and manufacturers of cheap hats, what of that?

The something of an art to be seem to possess especial attractions women to make the save of Spanish millinery had swept land many whose features are not lovely give the effect of beauty because they are graceful. There are two main causes of grace, the first, a healthy body with well co-ordinated muscles; the second. a lack of self-consciousness. The former really is necessary to produce the latter, but many apparently healthy people are not graceful because their development is not well balanced. Some are graceful only in the latter, but many apparently healthy people are not graceful because their development is not well balanced. Some are graceful only in the latter, but many apparently healthy people are not graceful because their development is not well balanced. Some are graceful only in the latter, but many apparently healthy people are not graceful because their development is not well balanced. Some are graceful only in the latter, but many apparently healthy people are not graceful because their development is not well balanced. Some are graceful only in the latter, but many apparently healthy people are not graceful because their development is not well balanced. Some are graceful only in the latter, but many apparently healthy because they are graceful.

North German Tootsle. "Lauve to "Tootsle." Lauve to "Tootsle." Lauve to "Tootsle." Lauve to "Tootsle." Lauve to " which they are most familiar. Thus a beautiful horsewoman or a swimmer is not unlikely to be an awk-ward walker. But the all-around athlete or the woman who from childhood has had free use of all her muscles and has kept her health is inevitably graceful.

Too heavy work of any sort, in the house or out of it, which overdevelopes any set of muscles, leaving others undeveloped, makes for awk-wardness. Drudgery, where the mind centers on the dreariness of the work rather than on the goal to be attained by it, or where the work is done under the direction of another person's will, also causes awkward-

person's will, also causes awkwardness. But idleness, self-indulgence and sloth are the worst enemies of grace. Play and dancing are nature's greatest specifics for grace. In play, self-consciousness is lost in the joy of the activity; in darking, in the influence of the music. The woman who works wisely with a will and plays and dances when she can will always be more graceful than the luxurious idler.

(Copyright, 1921.)

Variety With Cabbage. The cheapness of cabbage compared

with many other vegetables is something that recommends it to many but likewise this very cheapness seems to have made some housewives devote little attention to cabbage. They seem to think that just because it is inexpensive it lacks possibilities of flavor and that it isn't quite worth much attention.

t keeps fresh for some time. Thus, f you must order on Friday for vegetables to eat Monday or Tuesday

Don't make the mistake of cooking cabbage too long. The water should be boiling actively when the cabbage is put in the kettle and it should continue to boil rapidly with the cover off the kettle for half an hour, or until tender. It should then be removed at once and never allowed to lie in the water in which it has been boiled. It is a great mistake to think that cooking cabbage a long time will make it more digestible. As a matter of fact, it is long-cooked cabbage that has brought cabbage its bid reputation. When cooked quickly in actively boiling water it seldom causes any difficulty, and is really wholes while boiling.

Hashed cabbage is made by cooking the cabbage quickly as described draining and chopping in the chopping bowl. Put in a double boiler, add salt, pepper and other desired seasoning to taste and quickly reheat.

Cabbage cooked as described and AUTO INDUSTRY NEEDS TRAINED MEN. hen laid in a baking dish with a Prepare now for splendid openings in this then laid in a baking dish with a cream sauce poured over it and covered with bread crumbs and topped with grated cheese makes an excellent dish.
